Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8 are, drawn to a tool for shelling a crustacean to remove meat from a tail shell, classified in class 452, subclass 6.
- II. Claims 9-15 are, drawn to a process for shelling a crustacean to permit removal of meat from a tail shell, classified in class 452, subclass 1.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process of removing meat from a tail can be practiced by hand, and before the advent of modern technology and meat processing machines, that is how man removed meat from the tail shell. As a result, the restriction is deemed to be proper.

A telephone call was made to Mark Poland on January 25, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.
